# What can harmful microbes do? What does BioCote Technology do?

BioCote Technology makes your product antimicrobial, protecting it against bacteria and mould.

Your BioCote protected product is:

- ✓ more hygienic
- ✓ protected against stains
- ✓ protected against odours
- ✓ protected against material degradation
- ✓ easier to keep hygienically clean
- ✓ safer to use
- ✓ will last and perform longer

## Benefits - Performance characteristics

### Permanent

BioCote technology is integrated during manufacture its protection will last the expected lifetime of the product.

### Proven

BioCote technology reduces the levels of bacteria on a protected surface by up to 99.99%.

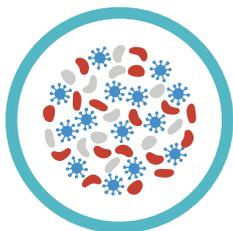

### Continuous

BioCote technology works continuously protecting around the clock.

### Protective

BioCote technology protects against the threat of cross-contamination.

### Effective

BioCote technology is proven to protect against a broad range of microbes. This includes bacteria, mould and the H1N1 virus.

### Futureproof

BioCote technology does not cause multi drug resistant strains of bacteria like MRSA.

*Use biocides safely. Always read the label and product information before use.*
