

COMARK

A Fluke Company

Comark Instruments

Temperature and humidity
measuring and monitoring in the foodservice industry

Maintaining the highest standards

Comark - foodservice temperature experts

From receipt at the back door, through to preparation and serving, you need to be sure that the correct cooking, storing and holding temperatures are maintained in order to keep food safe.

We know how important temperature is to any food safety or HACCP plan, that's why our range is designed with the food service professional in mind. From simple dial thermometers to digital instruments and automated data logging systems, there is something for every size of business.

T22038/A

Latte Thermometer

Tough, durable with easy to read face and clip for attaching to jugs and cups.

- Range: 0°F to 220°F
- Stem Length: 200mm

TC100

Hot Drinks Thermometer

- Range: -10°C to +100°C
- Stem Length: 125mm

Coffee / Hot Drink ◀ Thermometers

Meat Thermometers ▼

MT200K

Meat Thermometer

Dishwasher safe, adjustable temperature indicator and dual range readings.

- Range: +60°C to +85°C
- Stem length: 120mm

TCF220/3K

Meat Thermometer

Large face dial with dual °C/°F scale

- Range: -18°C to +105°C
- Stem length: 125mm

DOT2K

Oven Thermometer

Easy to read bold numbers and colour coded zones for quick reference, hangs or stands.

- Range: +100°C to +280°C

Fridge / Freezer Thermometers

RFT2AK
Fridge/Freezer Thermometer

Hangs or stands, with bold numbers and colour coded zones to show safe temperatures or possible spoilages.

- Dual scale: °C/°F
- Range: -30°C to +30°C

UTL80
Stick-On Fridge Thermometer

Easy to read colour coded dial face.

- Accuracy: ±1°C
- Range: -30°C to +25°C

Timers

FG80AK
Fridge/Freezer Thermometer

Easy to read bold numbers and dual °C/°F scale. Hangs or stands. Non-toxic, spirit filled.

- Range: -40°C to +27°C

DRF1
Fridge/Freezer thermometer

Bold digital display which can hang in fridge or freezer.

- Dual scale: °C/°F
- Range: -30°C to +70°C
- Accuracy: ±1.0°C
- Resolution: 0.1°C

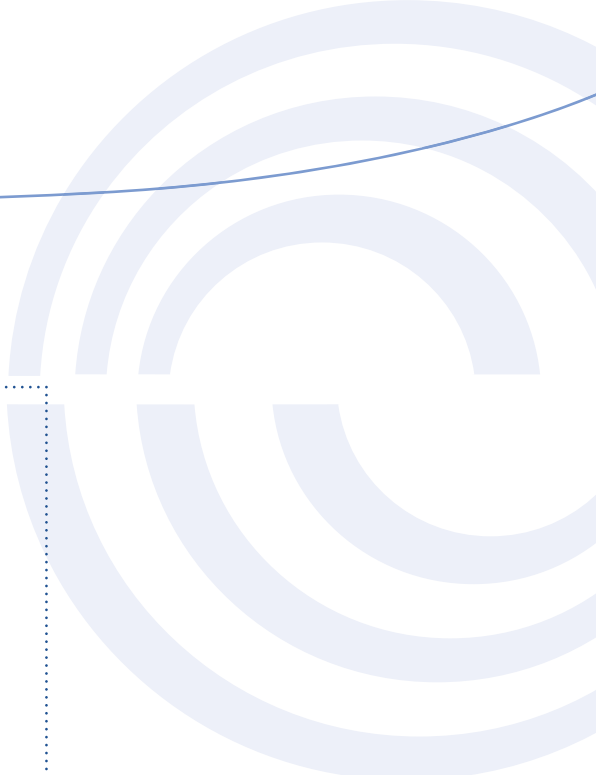

UTL264
Digital Timer

Extra large digits, with count down, buzzer, magnet and stand.

UTL882
Digital Clock/Timer

Has a countdown capacity of 24 hours. The memory timer allows you to store a pre-set time. Count-up in one second resolution up to 24 hours. Has stand, hook and magnet fixing options.

Pocket Digital Thermometers

DT400 Digital Thermometer

Thermometer as a thin tip and is field calibratable. Has max temperature hold and is commercial dishwasher safe.

- Accuracy: $\pm 0.5^{\circ}\text{C}$
- Range: -20°C to $+200^{\circ}\text{C}$

KM14 Digital Thermometer

This field calibratable thermometer has max temperature hold and is commercial dishwasher safe.

- Accuracy: $\pm 1^{\circ}\text{C}$
- Range: -20°C to $+200^{\circ}\text{C}$

PDT300 Pen style thermometer

Waterproof, field calibratable, and a thin 1.5mm tip - the most popular thermometer for measuring thin foods.

- Accuracy: $\pm 1^{\circ}\text{C}$
- Range: -50°C to $+150^{\circ}\text{C}$

KM400AP Allergen Thermometer

For use with foods or ingredients which may cause allergies. Has thin 1.5mm tip and is field calibratable.

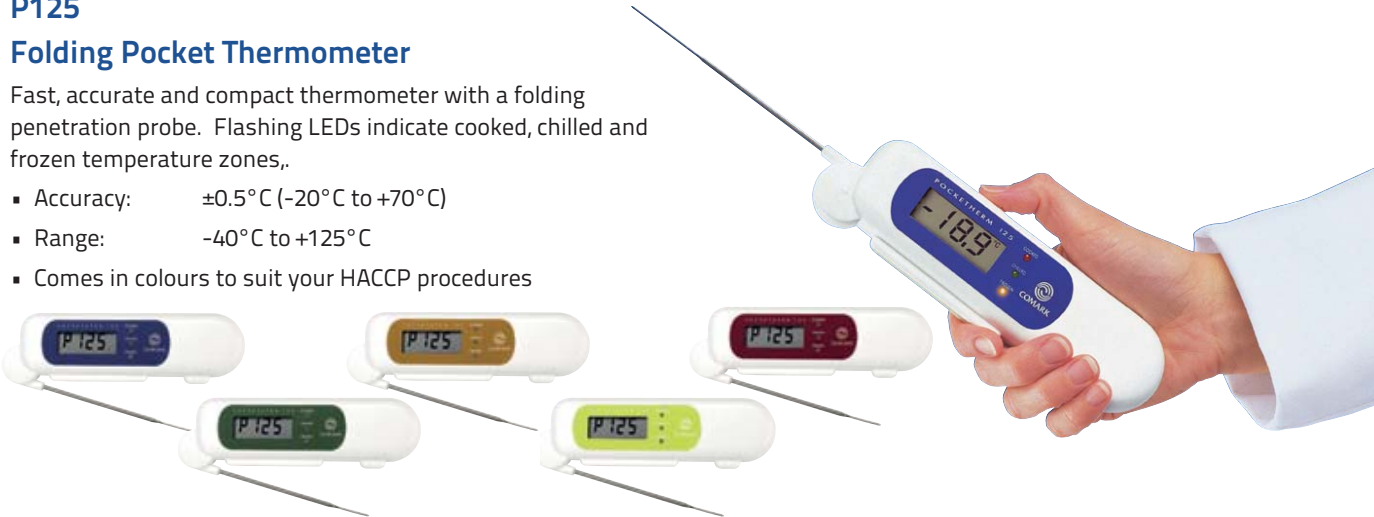

- Accuracy: $\pm 1^{\circ}\text{C}$
- Range: -50°C to $+150^{\circ}\text{C}$

PDQ400 Waterproof Digital Thermometer

For use with foods or ingredients which may cause allergies. Has thin 1.5mm tip and is field calibratable.

- Accuracy: $\pm 0.5^{\circ}\text{C}$
- Range: -20°C to $+200^{\circ}\text{C}$

P125 Folding Pocket Thermometer

Fast, accurate and compact thermometer with a folding penetration probe. Flashing LEDs indicate cooked, chilled and frozen temperature zones.

- Accuracy: $\pm 0.5^{\circ}\text{C}$ (-20°C to $+70^{\circ}\text{C}$)
- Range: -40°C to $+125^{\circ}\text{C}$
- Comes in colours to suit your HACCP procedures

▼ Infrared Thermometers

FP Infrared Thermometer

- Accuracy at 0°C to +65°C: 1°C
- Range: -30°C to +200°C

FPP Infrared Thermometer

- Has countdown timer and a flip-down penetration probe.
- Accuracy at 0°C to +65°C: 1°C
 - Probe Accuracy between -5°C and +65°C: $\pm 0.5^\circ\text{C}$
 - Range (Infrared): -35°C to +275°C
 - Range (Probe): -40°C to +200°C

Digital Thermometers ▼

C12 Thermometer

Simple single button operation and comes complete with probe.

- Range: -40°C to +125°C

C20 Thermometer with Lumberg Connector

Thermometer has a Lumberg connector and can be used with a range of Comark probes. Shown here with PX22L probe available separately.

- Range: -40°C to +125°C

Catercheck 3 Thermometer with fixed probe

This thermometer has a thermistor sensor and permanently fixed probe.

- Accurate Readings
- Range: -40°C to +125°C

Diligence WiFi

Cloud based data logging, view data from any internet enabled device

- Fully automated data collection
- Measures temperature and humidity
- Readings taken 24 hours a day, 7 days a week
- Alarm notifications
- View data via any web enabled device
- Monitor temperature controlled storage such as fridges, freezers, cold rooms, hot holding cabinets etc.

Contact Us

We understand there are times when our customers may need guidance on the best solution for their requirements. If you would like further information or to discuss your temperature monitoring application, please contact our customer service department who will be pleased to assist.
